TECHNICAL SKILLS

Backend

Java · Spring Boot · Hibernate/JPA · Kafka · REST/SOAP

Frontend

React · JavaScript · TypeScript · CSS

Architecture

Microservices · DDD · OpenAPI · Camunda

DevOps

Docker · Kubernetes · CI/CD

Game Dev

Unity · C# · AR/VR

LANGUAGES

English — Fluent

Italian — Basic

German — Basic

CERTIFICATES

PROFILE

Full stack software developer with 5+ years of experience, focused on delivering reliable products from backend architecture to user-facing interfaces. I take ownership across the full development lifecycle, collaborate closely with developers, QA, and product teams, and aim to turn complex business requirements into practical, maintainable solutions. Experienced in leading high-impact transitions such as monolith-to-microservice migrations and adapting quickly across different domains—from enterprise telecom systems to product-focused environments. My core strengths lie in Java/Spring Boot backend development, React-based frontends, and building software with long-term quality in mind.

PROFESSIONAL EXPERIENCE

ETIYA

Software Development Specialist

Hybrit, Istanbul · Dec 2021 – Jan 2025

- Led the migration from monolithic architecture to a microservice-based system using Java Spring Boot, applying domain-driven design and RESTful principles.
- Developed and maintained REST and SOAP APIs for reliable communication between distributed microservices.
- Implemented data persistence and ORM layers with Hibernate/JPA for relational database management across services.
- Built event-driven, asynchronous messaging with Apache Kafka to decouple microservices and improve scalability and fault tolerance.
- Defined and maintained API contracts using OpenAPI (Swagger) across microservice boundaries.
- Developed an Angular-based dashboard enabling developers and QA teams to monitor and manage order lifecycles.
- Modeled Order Management workflows using Camunda 7 and Camunda 8 BPM engines.
- Developed enterprise integrations using XML, XSL, and XSLT transformations.
- Containerized and deployed Spring Boot microservices with Docker and Kubernetes as part of the monolith-to-microservice transition.

CONNEXIO CLOUD

Full Stack Developer

Remote, NY · Mar 2022 – Aug 2022

- Worked as a Full Stack Developer delivering end-to-end features with Java Spring Boot on the backend and React on the frontend.
- Designed and implemented RESTful APIs with Spring Boot, applying layered architecture and clean separation between controller, service, and repository layers.
- Managed relational data persistence using Hibernate/JPA and integrated backend services with frontend applications.
- Built React single-page applications using reusable components, hooks, and props to structure modular and maintainable UIs.
- Connected React components to Spring Boot REST endpoints, ensuring reliable full stack communication across the application.
- Developed a Web3-compatible game with Unity and C#, implementing core mechanics, UI systems, and performance optimizations.
- Contributed to AR and VR versions of the game, participating in full-cycle development from concept through deployment.

CARETTA SOFTWARE

Intern

On-site, Istanbul · Jul 2018 – Aug 2018

- Get training about database structures and relations
- Analyzed and implemented a robust CRM system using C# within the .NET framework, enhancing customer engagement capabilities that contributed to increased user retention rates by 15% over three months post-launch.

EDUCATION

Istanbul Bilgi University

Bachelor of Engineering — Computer Engineering

Istanbul · June 2021

Project: BilgiLife

- Unity 3D campus exploration app for students and prospective students, modeled in Blender and SketchUp. (The Project of Term Award)

PROJECTS

Personal Portfolio Website

Software Developer · Istanbul · March 2023

- Designed the layout using Figma with a clean, modern UI approach.
- Built the application with React, structuring reusable components and managing state with hooks and props.
- Styled components with CSS for responsive layout and design consistency.
- Managed component communication and data flow using React state management patterns.
